Distribution Category UC-98

# Weekly Coal Production

Energy Information Administration  
Washington, D.C.

Production for Week Ended:  
February 1, 1986

# Highlights

U.S. coal production in the week ended February 1, 1986, as estimated by the Energy Information Administration, totaled 16.37 million short tons (bituminous coal and lignite, 16.30 million short tons; Pennsylvania anthracite, .07 million short tons). This was 12.7 percent lower than the previous week, and was 4.1 percent higher than production in the corresponding week of 1985.

Cumulative U.S. coal production from January 1 through February 1, 1986, was estimated at 75.83 million tons, 4.8 percent above the 72.39 million short tons produced in the comparable period in 1985.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
